

Assignments Module – 2 (Selenium IDE)

- What is Automation Testing?

Ans: Automation test is use of software to control the execution of test the comparison of actual outcomes to predicted outcomes.

- Which Are The Browsers Supported By Selenium Ide?

Ans: Mozilla Firefox, Google Chrome, Microsoft Edge, Safari, and Opera, among others

- What are the benefits of Automation Testing?

Ans: Speed, reliable, repeatable, comprehensive, reusable

- What are the advantages of Selenium?

Ans: Selenium is an open- source automation testing tool and it is free of cost to use.

Selenium provides high tester flexibility to write advanced and complex test cases.

Supports test scripts written in any user-preferred languages such as C#, Java, Perl, PHP, Python and Ruby.

Supports test case execution on multiple operating system such as Windows, Linux, Android, Mac and IOS.

Selenium supports parallel test execution.

Test cases can be executed while the browser window is minimized

- Why testers should opt for Selenium and not QTP?

Ans: Selenium supports a wide range of programming languages. QTP test scripts run only on the window environment. They can not be run across all browsers. Selenium is OS independent and allows test scripts to run across all browsers

- To validate the tops technologies website Contact us page and enter your friend detail at last "Guest Call Back" <https://www.topsint.com/contact-us/>

- To validate the tops technologies website Contact us page and enter your friend detail at last "Guest Call Back" <https://www.topsint.com/contact-us/> 1. To use assert 2. To use click and wait 3. To use locators 4. To use other command
